Part 3: Learning Outcomes

Main Goals: Through in-depth study of Beowulf in the original language, you should gain skill in close and careful reading of a particular medieval text as well as deeper knowledge of the culture that produced it. This class builds on Old English I and II in furthering your knowledge of Old English and giving you a better grasp of Modern English grammar. This class will also allow you to situate yourself more deeply within the long tradition of English literature and thought.

Read/Analyze. Your careful study of the assigned passages and texts in preparation for class should increase your level of comfort with the language and give you greater awareness of what is to be gained by close reading a particular text. Your reading will also tune you in to the conventions of Old English poetry. Lectures and supplementary reading will further orient you to the formal characteristics of Old English poetry.

Contextualize. Class lectures, assigned readings, and a variety of course assignments will introduce major terminology, methodology, and interpretive issues in studying Beowulf specifically and Old English and much medieval literature more generally. In addition, the resources will help situate Beowulf within its cultural, historical, and literary contexts. Class translation and parsing should increase your comfort with using grammatical terminology.

Research. The written assignments are designed to familiarize you with some of the tools and techniques of Old English linguistic research and the issues and methodologies involved in editing and translating.

Write. You should gain skill in writing focused and clear grammatical prose.
